TS®19 Test Set

Specifically designed for in-house telecom technicians, the TS®19 Test Set combines all the basic test set features at a value price – plus it provides DataSafe™ protection to prevent accidental disruption of data service in monitor mode.

• High-impedance DataSafe™ operation in monitor mode
• Tone (DTMF) and pulse operation
• Last number redial
• Polarity indication in talk mode

The Fluke Networks TS19 Test Set combines all the essential test set features at a value price. This test set was specifically designed for in-house telecom technicians. Its high-impedance monitor prevents accidental disruption of service from clipping onto a data line while in monitor mode, thus ensuring the integrity of critical data lines. Features such as tone (DTMF) or pulse operation, talk/monitor capabilities, polarity test button and last number redial make this test set the perfect combination of features and price.
